Accessory overview.

Streamers

The TV sound can be fed directly into Signia Nx or Pure 13 BT primax hearing aids via the **StreamLine TV** transmitter. Wearers can even adjust the TV volume individually via the myControl App.

The new **Streamline Mic** provides full hands-free audio streaming of phone calls and music with any Bluetooth smartphone. It also works as a remote microphone and is compatible with Signia Nx hearing aids.

The **easyTek** wirelessly connects hearing aids to different Bluetooth enabled devices so sound is streamed directly into the hearing aids. Plus, it also acts as remote control for program or volume adjustments and is controllable via the easyTek App.

Transmitters

The TV **Transmitter** connects TVs to the easyTek. This way, sound can be wirelessly streamed directly into the hearing aids.

The **Voicelink™** companion microphone connects to easyTek and miniTek and effectively transmits speech when wearers are attending conferences or presentations.

Remote control

Small enough to carry on a keyring, the **miniPocket™** is the ideal solution for anyone who wants discreet, convenient hearing aid control without the need for a large remote control or smartphone.

Remote control

The sleek **easyPocket** with large buttons and an easy-to-read display even gives users with dexterity issues easy access to their hearing aids.

Charging station

The **eCharger** recharges and dehumidifies hearing aids overnight, so your clients don't need to worry about handling batteries.

CROS/BiCROS

For People with unaidable hearing loss on one side. **CROS Pure Nx**, Cros Silk Nx and Cross Pure Receive sound on that side and transmit it to a hearing aid on the other side. CROS Silk Nx is the worlds only CROS CIC

Apps, accessories and hearing aid compatibility.

This overview shows you which apps and accessories work with our hearing aids. Depending on the solution your customers choose, they can even enhance their hearing experience and convenience with this well-matching portfolio.
